

Magnetic Liquid-Level Gauges for LP Gas Service

Comprised of ³/₄" male NPTF Junior gauges designed for use in DOT lift truck cylinders. Also suitable for use in certain recreational vehicle (RV) applications and as a replacement for ³/₄" NPT rotary type gauges up to 45" [114mm] in diameter.

General Information & Features

Gauges which accept snap-on Junior dials have 1 3/8" [35] hex wrenching flats. Gauges which accepts screw-on Junior dials have 2" [51] hex wrenching flats.

All dials used on these gauges indicate with limited arc due to size constraints imposed on gauge components which must pass through a ³/₄" NPT opening.

Cylinder Type	Cylinder Capacity	Capacity Diameter	Gauge with Screw-On Dial	Gauge with Snap- On Dial	Support Length	Float Length
Universal	20# [9kg]	12″ ID. [305]	7384-01005	7384-02004	7 1/8" [181]	5 ¼″ [133]
	33 ½# [15kg]		7384-01006	7384-02005	12 5/16" [313]	
	43 ½# [20kg]		7384-01007	7384-02006	19 ¼" [489]	
vertical	14# [6, 4kg]	9″ ID. [229]	7381-01003	7381-02205	10 ¾" [273]	4" [102]
	20# [9kg]		7381-01002	7381-02206	7 5/16" [186]	
Horizontal	20# [9kg]	12″ ID. [305]	7384-01028	-	5″ [127]	6 7/16" [163]
	33 ½# [15kg]					
	43 ½# [20kg]					
	60# [27kg]					
	60# [27kg]	- 14 ½″ ID. [368]	7384-01029	-	8 1⁄2" [216]	7 ¾″ [197]
	100# [45kg]					

See reverse side for dimensional data, materials of construction, performance, and advice on how to order.

Since the suitability of these products depends upon a wide range of factors not in our control, Rochester Sensors expects and understands that you will conduct the testing and evaluation necessary to determine that these products are suitable for your application. Whilst every effort is made to ensure the above details are correct at the time of printing, Rochester Sensors reserves the right to make material changes, and or technical changes without notification.

General Specifications*

Temperature Range Standard range -40°F to +158°F, -40°C to 70°C. Shock Designed for lift truck and portable cylinder service applications. Vibration Designed for lift truck and portable cylinder service applications. Voltage 24 volts maximum nominal system voltage on TwinSite[™] versions. Working Pressure 375 psig [25,9 Bar] Approvals UL listed for LP Gas service applications.

When ordering, specify:

- **1.** For standard gauges, use the part number from the lift truck gauge selection chart.
- **2.** For non-standard gauges, state the cylinder type (horizontal or vertical), capacity, diameter, height, mounting location, offset and furnished tank drawings whenever possible.
- **3.** Furnished riser or recess dimensions if applicable.

To order replacement gauge, simply furnish the information stamped on one of the heads, as shown in the example.

Note: For threaded gauge installation instructions see MS-516. For 7300 series installation instructions see DS-996.

Materials of Construction*

Head

Zinc die-casting. Centershaft Bearings, Gears & Dial Mounting Screws Stainless Steel. Support, Centershaft & Float Rod Tempered aluminum. Float Bulb Nitrile rubber. Counterweight Lead. Magnet Alnico. Direct Reading Dials Ultrasonically welded, hermetically sealed polycarbonate. Gear housing Acetal.

*Materials and specifications are subject to change without notice. Pressure ratings subject to change due to temperature and other environmental considerations.
