

Magnetic Liquid Level Diesel Fuel Gauge

Application

The Junior Gauge is designed for use on 18" through 24" horizontal cylinders for diesel fuel tanks. This gauge measures the liquid contents of a horizontally mounted tank.

General Information & Features

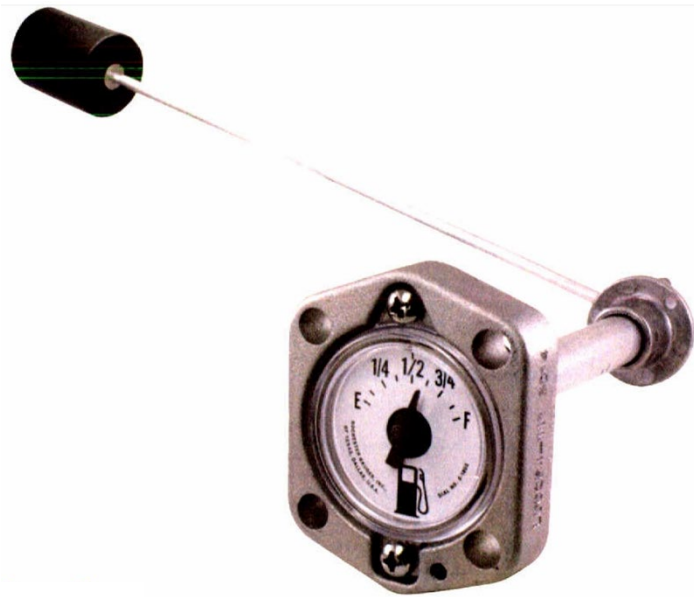

The gauge head accepts a Junior dial.

The gauge uses a simple lever action. This construction reduces the number of parts and improves reliability and accuracy.

Centerline mounting only.

Replaceable Dial S/A: 5323S01802

Materials of Construction

Head – Aluminum

Support, Centershaft, Float Arm – Aluminum

Bearings – Stainless Steel

Float – Nitrile Rubber

Magnet – Alnico

Direct Reading Dials – Ultrasonically welded, hermetically sealed polycarbonate

General Specifications*

Temperature /Range – Standard range is -40°F to 158°F, -40°C to 70°C

Shock – Mobile service applications

Vibration – Designed for Mobile service applications

Working Pressure – 50 Psig [3, 5 Bar]

Note: accuracy may be less for some tank shapes and sizes. Accuracy may be less if tank is not level. Accuracy may be less near empty and full. This gauge is not to be used for filling.

Specifications subject to change without notice. Pressure ratings are subject to change due to environmental conditions such as temperature.
